PROFILE & SKILL

Flutter Mobile Developer focused on Clean Architecture and SOLID Principles, experienced in building scalable, maintainable mobile apps using Flutter & Dart. Skilled in state management (BLoC, GetX, Riverpod), integrating REST APIs, Firebase, third-party services, and handling real-time data. Experienced with Dynamic Forms, online payment integration, and deploying apps to App Store & Google Play Store. Passionate about writing clean, testable code and leveraging AI tools to improve development efficiency.

SKILL

- Flutter & Dart development
- Clean Architecture & SOLID Principles
- State Management: BLoC, GetX, Riverpod
- REST APIs, Firebase, Third-party services
- Real-time data handling (WebSocket)
- Dynamic Forms & user status tracking
- Online payment integration (Taxi, Food Delivery, Express apps)
- App deployment: App Store & Google Play Store

EXPERIENCE

Mobile App Developer — *2024 – present*

- Design, develop, and maintain Flutter apps for iOS and Android
- Manage app state using BLoC, GetX, and Riverpod
- Integrate REST APIs, Firebase, and third-party services
- Collaborate with UX/UI, Backend, and QA teams to optimize code and performance
- Deploy apps to App Store & Google Play Store

Final Project (Bachelor's Degree) — *2023 – 2024*

- Designed and developed a mobile application using Flutter
- Implemented responsive UI and core application features

Internship at Sokxay group — *2022 – 2023*

- Developed and maintained a product sales management system
- Developed and tested a barcode generator for production use
- Developed and deployed a meeting room reservation system hosted on IIS

Key Projects

- Taxi, Food Delivery & Express Apps – Real-time tracking, notifications, in-app chat/call
- Business & Government Service Apps – Dynamic Forms and real-time status tracking
- Bus Trip App – Live trip tracking, station notifications, ticket scanning
- EV Charging App – Real-time EV charging station availability
